

PMF9D22 Wood Pellet Making Machine

Parameters:

Model	Engine	Power	Capacity	Net/ Gross Weight	Packing Size with Engine	Packing Size without Engine
PMF9D22	Diesel	22Hp	330~662(lb)	617/684(lb)	61*33*39(in)	46*33*33(in)
Warranty: 1 Year			Pellet Size: Can Adjust By Your Demand			

Wood Pellet Making Machine Details:

Roller Parts: Rollers are the core parts for making pellets. The rollers of our pellet making machines are made of precise material of alloy metal which makes the roller anti-bearable and no easy to broken. The simplest pellet making machine has one pair of rollers. But now, the new developed flat die pellet maker have two or three pair of rollers which have bigger capacity of making pellets.

Die Parts: The die parts have many holes for extruding material for compressed into formation of pellets. The holes of die have 6-8 mm diameter for your choose or we can make as your required.

Wood Pellet Making Machine Packaging Details:

Payment Terms: L/C T/T

Package: Wood Case

Delivery Time: 20 Days

Biomass Pellets Produced By This Pellet Making Machine:

Performance Features:

- ★ Transmission gears made of **high quality alloy steel**, surface adopts **carburizing** and **quenching treatment, precision machining** by grinding, smooth transmission, low noise, large carrying capacity, low temperature rise, long life etc.
- ★ Spindle with a heavy thrust bearing, support axial force, **long lifespan**.
- ★ Roller and flat die wear peace deal; both sides can use the flat die, long service life.
- ★ Pellet machine uses large diameter roller, big yield, pelletizing rate is high, uniform **high strength pellets**.
- ★ All bearings are sealed structure that **effectively prevent dust**, improve the working bearings environment, **extending bearing life**.
- ★ Highest grade tool steel die and rollers that are designed to fit YOUR PRODUCT.
- ★ Full consultation at NO CHARGE at YOUR FACILITY!
- ★ Low wear of roller, dies and bearings.
- ★ **Do not need to add binder**.
- ★ Pellets diameter is from 6-12mm for user select.
- ★ **Easier to clean** than pellet machine with ring die.
- ★ Small and lightweight, **available for homemade or farm pellet production**.
- ★ High adaptability to different raw material: sawdust, plastic, foam, wheat, barley, cotton, fiber waste, branch, bamboo, wheat straw, hay, peanut shell, paper, sorghum, algae, feed, fertilizer, rick husk, sun flow stem, palm kernel shell and other biomass materials.

Buy wood pellet making machine from USA Pellet Mill Shop: CE certified biomass pellet maker for sale online. Fast Shipping, Great After-Sale Service!

Looking For Biomass Pellet Makers for Sale? Get The Fact First!

As the core part of biomass pellet production line, [biomass pellet maker](#) or diesel pellet mill largely affects the profits of pellet making business. So think twice when pay for the wood pellet making machine. Generally speaking, there are two choices for you, pellet making machine with flat die and pellet making machine with ring die. At [pelletmillshop.com](#), we usually promote for sale flat die pellet making machines. In most cases, flat die pellet maker is suitable for small-scale to medium-scale pellet making business or family pellets pressing. It could be called the smallest pellet making machine except mini pellet maker.

Pellet roller and pellet die are the two most important components of biomass pellet maker. With the help of pressure and heat, the raw materials shape into cylinder when forced through the pellet die by the roller. When choosing the right [wood pellet making machine](#), pay more attention to pellet dies because the pellet quality depends largely on the design of pellet machine die. The die of a good pellet making machine should be resistance to abrasion and breakage. Among various pellet die materials, high alloy steel is the optimal choice.

Wood Pellet Making Machine and Biomass Pellets

A wood pellet making machine is more durable when compared to feed pellet maker. As the result of high density, woody biomass material needs higher pressure and more heat during the forming process. So, for large scale pellet making process, you should buy some additional equipment such as a conditioner and steam.

[Wood Pellet Making Machine](#) for Sale and Free Consultation Service

With professional experience of various biomass materials pelletizing process, while selling pellet making machines, we also offer a free consultation service on pellet machine operating and adjustment.

Also, if you are interested in our pellet machines and want e in-depth understanding, you are welcome to [contact us](#)! We are glad to communicate with you in some visualized way such as pellet pressing videos and manufacturing photos. If you are the beginner of pellet making machine for wood, we are pleased to recommend you the right wood pellet making machine depending on your specific conditions and demands including your raw material, pellet productivity required.

Interested In Pelleting Or Pellet Machine?

Contact us now, and our service team will give you a detail introduction of biomass pellets and pellet machines. All your consultations are FREE!

E-mail: info@pelletmillshop.com

Our office staff is available to answer your questions, Monday through Friday, from 8:00 to 4pm (CST)
